**Notes:**

[1] The costs for the underlying OEICs held by each Fund are now being calculated on the full arrival price slippage methodology.

[2] When a Aberdeen Standard Investment fund lends stock it is entitled to receive 85% of the income earned. The remaining 15% belongs to the stocklending agent. The costs suffered by the fund are disclosed but not the income in accordance with regulations.

[3] This is the cost incurred on the Fund when it purchases or sells the underlying asset (OEIC) as the price may include a dilution adjustment. The purpose of dilution is to ensure the OEIC performance is not impacted by large investments or disinvestments.

[4] The total charges impact to policyholders on each Equitable Life Fund of costs at both Fund and underlying OEIC level and includes the annual management charge.

[5] The calculations for the Managed Funds are based on the relevant calculations for the underlying OEICs held within the portfolio, prorated based on the portfolio percentage held.
